

Getting Ready For Installation Day

All AIM Home Automation Clients

- ✓ Please clear the area around the windows / electrical we will be working on. If you need assistance, please let us know ahead of time, and we are happy to help!
- ✓ Planning ahead for the closeout process – this will include:
 - Inspecting completed work
 - Payment Processing – We kindly ask our clients for project balances to be paid in check. However, we will also accept the original payment method.

PowerView & Lutron Clients

- ✓ We will need access to your wifi to program your automated system. Please write this information down for your installation crew.
- ✓ At the end of the installation, our team will program your PowerView or Lutron automated system. Please be available to learn how to use your new system as well as communicate your setting preferences to our installation technicians.

Ask About Becoming An AIM Member

The AIM standard doesn't end after your installation! We offer year-round unlimited shading and lighting support. While our team is at your home, ask how you can save with an AIM Membership.
